

REACH – Customer Information

Reference: REACH – Directive

(Registration, Evaluation, Authorization and Restriction of Chemicals/ Regulation (EC 1907/2006))

According to the REACH directive, our products are defined as „articles“.

None of those are containing a substance or mixture that is intentionally released from the product during normal and foreseeable use.

Therefore those articles must not be registered.

Erocarb is a so called “downstream user”. There are some components of the crosshead that might be coated with nickel. This metal is mentioned on Entry 27 of Annex XVII to REACH. But these parts are never permanently to be held by operators. Moreover these parts are sporadically taken by operators equipped with gloves. Thus no direct contact with skin may occur.

Erocarb is willing to equip his customers with mechanical and hydraulic assemblies that fulfil all the requirements about materials according to the REACH directive.

On June 27, 2018, the European Chemicals Agency (ECHA) added lead to the Candidate List as an SVHC substance. As part of our duty to inform under Article 33 of the REACH Regulation, we are required to notify our customers without being asked if substances classified as substances of very high concern (SVHCs) on the current Candidate List are present in a concentration of more than 0.1% by weight in the products we supply. For this reason, we hereby inform you that our products may contain the following substance, classified as a substance of very high concern on the Candidate List, in a concentration exceeding 0.1% by weight :

Substance : Lead CAS No. 7439-92-1 EC No. 231-100-4

Use of the substance :

- electrical contact parts made of copper alloys (brass)
- high-performance heating elements containing copper alloy (brass)
- mechanical parts made of copper alloys (brass and bronze)

Lead is classified as toxic to reproduction. Appropriate occupational health, safety, and waste-handling regulations must be observed when processing or using materials containing lead.

We undertake to fulfill our obligation to provide information pursuant to Article 33 of the REACH Regulation should we receive additional information from our suppliers.

Best regards
